Researchers' statement

We are asking you to be in a research study. The purpose of this consent form is to give you the information you will need to help you decide whether to be in the study or not. Please read the form carefully. You may ask questions about the purpose of the research, what we would ask you to do, the possible risks and benefits, your rights as a volunteer, and anything else about the research or this form that is not clear. When we have answered all your questions, you can decide if you want to be in the study or not. This process is called "informed consent." We will give you a copy of this form for your records.

PURPOSE OF THE STUDY

The aim of this research project is to better understand how technology can impact learning outcomes in computer science.

STUDY PROCEDURES

During the session, you will be asked to engage with a lesson plan that we have prepared, including writing some code. You will also be asked to answer some questions before and after the lesson on the topics covered.

Note: We will **not** record your screen nor your audio; however, you will be asked to share your screen with the investigator as you go through the study. We may take notes, but all notes taken will be completely anonymized.

The entire session will take no more than 1 hour and 30 minutes.

RISKS, STRESS, OR DISCOMFORT

There are no reasonably foreseeable risks of harm beyond normal risks from computer usage and narration.

In the unlikely event that a breach of confidentiality were to occur, the only identifiable information we will have about you will be your email address, and it will not be linked to your performance in any way. Your email address will only be used for sending gift card codes as

compensation for participation. After you have received your compensation, we will delete your email address from our files.

BENEFITS OF THE STUDY

Information obtained from this study will be used to better understand the role of technology in computer science education. You will not personally benefit from being in this study.

CONFIDENTIALITY OF RESEARCH INFORMATION

Our study data will be anonymous and only accessible to research personnel. There will be no link between the information we collect during the session and information (like your email) that could identify you. All collected data will be deleted within five years of the completion of this study.

OTHER INFORMATION

You may refuse to participate, and you are free to withdraw from this study at any time without penalty or loss of benefits to which you are otherwise entitled.

If you decide to participate in this study, we will send you a $30 Visa gift card code within the next month regardless of whether you complete the study or not.

RESEARCH-RELATED INJURY

If you think you have been harmed from being in this research, contact Dhanya Jayagopal, dhanyajayagopal@berkeley.edu

Subject's statement

This study has been explained to me. I volunteer to take part in this research. I have had a chance to ask questions. If I have questions later about the research, or if I have been harmed by participating in this study, I can contact one of the researchers listed on the first page of this consent form. If I have questions about my rights as a research subject, I can call the University of California, Berkeley Human Research Protection Program at (510) 642-7461. I will receive a copy of this consent form.
